DATA RELEASED BY EXTERNAL AFFAIRS MINISTRY

Ahead of UN meet, India says 21 killed this year in ceasefire violations by Pak
Says 2,050 instances, including in support of cross-border infiltration

The Indian Express Monday, September 10, 2018, New Delhi, Late City, 20 Pages
Michaelhya Singh Manwal & Devendra Pandey, New Delhi; September 10

An Indian official says that the Pakistan Army has killed at least 21 people across the Line of Control (LoC) since the beginning of a ceasefire agreement with India in November 2003, and that 2,050 ceasefire violations have occurred in the past year. These include instances of cross-border infiltration, which has been a major concern for India.

The official, who did not wish to be named, said that the Pakistan Army had been responsible for 80% of the attacks, while the Indian Army had been responsible for 20%. He added that the attacks had been carried out in a coordinated manner, with Pakistan Army soldiers infiltrating into Indian territory and then ambushing the Indian Army from behind.

The official also said that the recent attacks had been particularly brutal, with many soldiers being killed or injured. He added that the Indian Army had been taking all necessary steps to ensure the safety of its soldiers.

The official emphasized the importance of maintaining the ceasefire agreement, which has been in place since 2003. He said that both countries needed to work together to ensure the safety of their citizens and to maintain peace in the region.

Meanwhile, Khattar says Haryana will have its NRC

Haryana Chief Minister Manohar Lal Khattar has said that Haryana will have its own National Register of Citizens (NRC) by December this year. He said that the state government will be setting up a NRC committee to conduct the enumeration process. He added that the committee will be headed by a senior official from the Central government.

The move comes as the Centre has announced plans to conduct the NRC in the entire country, with the goal of identifying illegal immigrants. Khattar said that Haryana would follow the same protocol as other states.

A NRC is a list of citizens who are eligible to vote in elections and to hold citizenship. The process involves a comprehensive verification of documents and identification of citizens who have entered the country illegally.

In response, Pakistan has said that it will continue to support the rule of law and democratic principles in India. However, the Pakistan government has also expressed concerns about the NRC process, saying that it could lead to displacement and human rights violations.

The issue of NRC has been a sensitive one in India, with people from different communities and backgrounds being affected. Khattar has said that the NRC will be conducted in a fair and transparent manner, with the participation of all stakeholders.
45,000 people evacuated as heavy rain lashes MP

Uttar Pradesh has been hit by floods claiming 15 lives, prompting authorities to evacuate more than 45,000 people from flood-prone areas.

The state government has declared a flood emergency in 15 districts, including Allahabad, Lucknow, and Varanasi, where the Ganges and Yamuna rivers have swelled. The authorities have set up relief camps and provided food and shelter to the affected people.

The flood situation has worsened in recent days with continuous rainfall in the region. The water level in the Ganges and Yamuna rivers has risen to alarming levels, posing a serious threat to the lives and property of the people in the affected areas.

The state government has urged the central government for further assistance in controlling the flood situation. The authorities have also appealed to the public to remain alert and take necessary precautions to avoid any loss of life and property.
Army officer who died in Congo was to return to India this week

DROWNED IN LAKE WHILE TRYING TO SAVE COLLEAGUE

In his 15 years with the Indian Army, the 38-year-old Col. Gurmeet Singh had served in various parts of the country, including in Kargil. He had also posted to the United Nations as a military observer in Lebanon.

The Army spokesperson said, “He was a man of high character and a role model. He will be missed.”

Col. Gurmeet Singh was posted at the United Nations Mission in Lebanon (UNIFIL).

His family and friends paid tribute to him on social media platforms.

氮酸盐、二氧化硫等常常会短时间内在空气中积累，从而对人体健康和环境造成影响。
CONCEPTUALIZED IN 2008, Gurgaon’s Rapid Metro was meant to address the “inadequate population and corresponding lack of adequate transport to keep up with the projected growth of the city.” Designed to be a 12.1-km-long, 11-station metro line, the Gurgaon Rapid Metro’s planned line constituted an extension of the Greater Noida-West-based metro line and was meant to connect the Gurugram–Ghaziabad–Faridabad region with the Delhi metro network.

A measurement of 11.7 km with 11 stations on its route makes this a considerable metro project. The line, and people who use it today, are at an intersection of two major problems.

Several stations face the issue of limited usage, as it has been observed that the metro network is not reaching its full potential. However, the Rapid Metro, which was meant to provide a quick and cost-effective means of public transport, now appears to be a failure.

Although the Rapid Metro provides connectivity between Cyber City and Golf Course Road, where several offices, malls, and high-end condominums are located, the problem seems to have been the lack of awareness among people about the benefits of using it. Additionally, the slow and difficult process of obtaining a pass for the Rapid Metro has been a major drawback.

In light of this, it is a matter of concern that the Gurgaon Rapid Metro may well be another failed project.

The Rapid Metro provides connectivity between Cyber City and Golf Course Road. Photo: Sameer Khurana

Rapid decline

Caught in a tussle between the Haryana authorities and the companies handling it, the Gurgaon Rapid Metro stands at an uncertain future. SAKSHI DALYAL’s report on the project reveals that 59,000 people every day use the Rapid Metro, but the company that expects to service the project on behalf of the Haryana government, the Delhi-Mumbai Industrial Corridor Development Corporation Limited (DMICDC), is not completely sure.

While Phase 2 is meant to open to commuters from November 2020, Phase 2 was completed in March 2020.

According to S. K. Rastogi, after Phase 2’s opening, Rapid Metro has run into financial trouble with the company losing money on running the project.

While the Rapid Metro is meant to serve the Gurugram region, it appears that the project is not delivering the expected benefits.

The Rapid Metro provides connectivity between Cyber City and Golf Course Road. Photo: Sameer Khurana

The projects, its troubles

It is seen that while Gurgaon Rapid Metro has failed, the DMICDC is working on another Rapid Metro project in the Gurugram region, the Rapid Metro 2, which is meant to connect the Gurugram–Ghaziabad–Faridabad region with the Delhi metro network. While this may not be a direct comparison to the Rapid Metro project, it highlights the continued efforts to improve the connectivity of the region.

The publication highlights what at stake. It is not clear what future it will have, with the government of Haryana not showing any interest in the project. The lack of interest from the government has resulted in a logjam of the project, which is still under construction.

However, the lack of interest from the government has resulted in a logjam of the project, which is still under construction. The government of Haryana has not shown any interest in the project, and the lack of interest has resulted in a logjam of the project.

People now have faith that if I work as per law, I will get security. Work of Congress should be taken seriously.

September 19, 2019

YOGI ADITYANATH

Education and health, you said, are your twin areas. But as a soon-to-be-career, you staged the previous government’s laptop scheme.

Yogi Adityanath, chief minister of Uttar Pradesh, and now a politician, was a priest in the Indian Army. He retired as a lieutenant colonel. He has served as the administrator of the temple town of Ayodhya, and he has been a member of the Lok Sabha, India’s lower house of parliament, since 2014.

We have been working hard to improve education and health, especially in rural areas. We have increased the number of schools and hospitals, and we have also introduced new courses in schools, like science and technology.

Regarding the laptop scheme, it was a part of our government’s efforts to provide students with better access to educational resources. We have also introduced a scholarship scheme for students from economically backward families.

I agree with you that education and health are important, and we will continue to work on these areas. However, I believe that our government’s efforts in these areas are not as good as you think.

I think that in the last two and a half years, we have made significant progress in improving education and health. We have increased the number of schools and hospitals, and we have also introduced new courses in schools, like science and technology.

I believe that our government’s efforts in these areas are not as good as you think. However, I think that we will continue to work on these areas and improve them further.

Your suggestion to increase the number of schools and hospitals is a good one, and we will consider it. However, we also need to consider other factors, such as the availability of funds and the need to prioritize the areas that are most in need.

I think that we will continue to work on these areas and improve them further. We will also consider your suggestion to increase the number of schools and hospitals. However, we also need to prioritize the areas that are most in need and ensure that we have enough funds to do so.
NASA lunar probe may shed new light on Vikram lander

Officials give details of PM's presence and support to Chandrayaan-2 team

SAI SONG
PUNE, NEW DELHI

All BIDDING figures outweigh what happened on the moon in the early hours of Saturday, 19th, as the Prime Minister's visit to the Vikram lander landing site to support the Indian Space Research Organisation (ISRO) space mission was confirmed by the PMO.

The Prime Minister's, on the other hand, was also expected to grace the event. The Prime Minister is expected to inaugurate the ISRO's new facility in Bengaluru. The event is expected to be attended by the Prime Minister and senior officials of the space agency.

In the absence of the Prime Minister, the ISRO's new mission was inaugurated by the ISRO's chairperson, K Sivan, and the ISRO's director, G Madhavan Nair. Cong gets Yashwant: Independent MLA, INLD leaders join ranks

MARK GOSWAMI
PUNE, NEW DELHI

In a shot in the arm for Congress in north India, including its former ally INLD, senior party leaders joined the party on Sunday, including Congress leader Yashwant Sinha and former INLD leader Harish Rawat. The move is seen as a significant development in the party's electoral strategy in the region.

Yashwant Sinha has been an important figure in Indian politics for several decades. He was a long-time member of the Congress Party and held several key positions in the party, including the post of Finance Minister. He has also been actively involved in various social and political issues.

NO HALF MEASURES
Government needs to up public spending and investment in stalled projects to beat the slowdown

OVR THE WEEKEND, the government announced measures aimed at reviving the country’s troubled banking and real estate industries. These include a 20,000-crore rupee facility to help the completion of affordable and middle-class housing projects that have been stalled; an interest subvention scheme for small and medium enterprises (SMEs); and other measures. The government promised funds to help small businesses, but these have been delayed due to a lack of proper implementation.

The banking sector has been facing a liquidity crisis, which has led to a slowdown in the economy. The government needs to take urgent steps to help the industry recover.

COMMENTS

The price of urea has been increasing sharply in the recent past. The government's policy on urea has been too lenient. The prices of urea are not in line with the production cost. The farmers have been suffering due to this. The government should take immediate steps to control the prices of urea.

The government should also look into the issue of the pricing policy of urea. The prices should be kept in line with the production cost. The farmers should be given adequate compensation for the losses they have incurred due to the high prices of urea.

RAJASTHAN REBOOTS THE RTACT
Jan Soodchana Portal to provide Rajasthan govt information at the click of a button
Citizens can access data about 23 flagship schemes and services of 13 departments on their mobiles

DEEP MUNSHI
JALPANA
SEPTEMBER 15

ON SEPTEMBER 13, Rajasthan chief minister Ashok Gehlot launched the Jan Soodchana Portal, aimed at curbing the access to information in various areas of governance. The portal has been created by the Rajasthan government’s health department in collaboration with the social media company Jeeblo through its Communiqate DigiTech Pvt Ltd (CDSL) in collaboration with the Department of Information Technology (DoIT). The state has named the Section 47(2) of the Right to Information Act, 2005, and an amendment to it, to make the state government’s information section require all government departments to prepare and maintain an electronic database that is open to the public. The portal also enables users to file online FIRs without visiting police stations. An information desk has been set up from pillar to post to try to figure out the reason.

Now every 11th resident of Gorbandh, a suburb of Jaipur city in Mehsana district, has been given a chance to visit the 13 departments of the government for information, offering a much-needed tool for citizens who hadn’t been consulted in their accounts. In Rajasthan, thousands of people have experienced the lack of information about the government and the nature of their complaints. The government has now offered them an opportunity to access the information they need to know. The portal was launched by the chief minister himself, who said that it was a step in the right direction.

At present, the portal has information on all 23 flagship schemes from 13 departments, which the public can access, and even submit their on-computer queries, mobiles or kiosks installed in villages. The portal is a one-stop shop for information on several schemes, including Mahila Shakti Pariyojana, Kishore Samman Yojana, Jan Arogya Yojana, Swachh Bharat Abhiyan, and others.

We realised that the government is faced with a rush of people to the secretariat, especially on weekends. The government was also in great need of a system to make information accessible to the public.

The government has now created a portal that will make it easier for citizens to access information. The portal is a one-stop shop for information on several schemes, and can be accessed through a mobile app.

The portal aims to provide information on various schemes and services of the government, making it easier for citizens to access the information they need. The portal is accessible on mobile phones and computers. The portal also allows users to submit queries online, which will then be answered by the government.

The portal will help in the dissemination of information and will help in the ease of access to the public. It will also help in the transparency of the government and will help in the accountability of the government.

The portal will also help in the easy access to the information and will help in the ease of access to the government. It will also help in the transparency of the government and will help in the accountability of the government.

The portal will also help in the easy access to the information and will help in the ease of access to the government. It will also help in the transparency of the government and will help in the accountability of the government.

The portal will also help in the easy access to the information and will help in the ease of access to the government. It will also help in the transparency of the government and will help in the accountability of the government.

The portal will also help in the easy access to the information and will help in the ease of access to the government. It will also help in the transparency of the government and will help in the accountability of the government.

SAUDI ARABIA

Saudi Arabia’s core inflation rate in September hit a higher-than-expected 7.8%, after accelerating in August, as food prices rose, bolstered by higher oil prices.

Saudi Arabia’s headline inflation rate is currently 7.8%.

The data comes amid higher oil prices, which have recently hit $80 a barrel, and as food prices have risen in recent months.

The surprising rise in inflation is likely to add pressure on Saudi Arabia’s central bank to carry out more quantitative easing, which could include more aggressive rate cuts.

The headline inflation rate, which includes food and energy prices, rose to 9.1% in August from 8.9% in July.

The core inflation rate, which excludes food and energy prices, rose to 5.3% in August from 5.1% in July.

The central bank is expected to announce its interest rate decision on October 20.

AGENCE FRANCE-PRESSE

SAUDINEX’s 2nd quarter profit is attributable to a higher share of ownership in its subsidiaries, which are responsible for the majority of its revenue.

Saudi Arabia’s non-oil sector has been seeing a recovery in recent months, as the global economy has improved and as the country’s energy sector has continued to expand.

The non-oil sector is expected to contribute 10% to Saudi Arabia’s GDP in 2021, compared to 8% in 2020.

The central bank has been cutting interest rates in recent months to support the economy and to encourage borrowing.

The bank has cut its benchmark interest rate to 1.75% from 2.5% in June.

The Bank of England has also cut its interest rate to 0.5%, the lowest level since 1964, to support the economy.

The cuts in interest rates are expected to lower mortgage rates, which could encourage more people to buy homes.

The central bank has also announced plans to increase its monetary base by 50% in 2021, to support the economy.

The increase in the monetary base is expected to be transmitted to the banking system through higher lending rates and lower interest rates.

The central bank has also announced plans to increase its monetary base by 50% in 2021, to support the economy.
The War in Afghanistan

Talking Chop

America will have to resume negotiations with the Taliban eventually.

US troops at their base in Logar province, Afghanistan, in August 2018. An abrupt American pull-out would make matters worse, dooming Afghanistan to an even bloodier civil war and possibly to an eventual Taliban victory. (Reuters)

FOR MONTHS America and the Taliban had been haggling over as agreement to end their 17-year war in Afghanistan. As war talks dragged on in late August, US President Donald Trump announced that a deal had been struck, only to reverse himself days later, saying at least 100,000 US troops would remain in Afghanistan. How US forces will be withdrawn, how quickly and at what speed, remains to be seen.

The Trump administration is divided. White House senior adviser Jared Kushner, a key negotiator in the talks, has been pushing for the US to pull out of Afghanistan, whereas national security adviser John Bolton has been a staunch opponent of any American withdrawal.

If military victory is unattainable and surrender unpalatable, that leaves only one option: more negotiation. The Taliban say they are open to dialogue. Fine. Let them talk with the elected government of Afghanistan.

Rule by the whip

The nationalist hero who destroyed Zimbabwe was 95

ROBERT MUGabe died on September 6. A man who roared to the heights of power in a bluster of braggadocio and egotistical boasting, he proved a man whose moment was not the same as his country's.

He was no statesman but a politician who thrived in sordid obscurity. He was a nameless nobody when he rose to power in 1980.

He was the son of a wealthy and well-educated family in the Southern Rhodesia highlands, the son of a wealthy and well-educated family.

But he was also a man of the people, a man who rose from the slums of Bulawayo to become the leader of an independent Zimbabwe.

He was a man of the people, a man who rose from the slums of Bulawayo to become the leader of an independent Zimbabwe.

The late Robert Mugabe, once the symbol of African nationalism and liberation, is dead at the age of 95.

The former president and leader of Zimbabwe was a controversial figure, loved by some and hated by many, and his legacy is still debated in the country he governed for over 37 years.

PRESS TRUST OF INDIA
DUBAI, SEPTEMBER 15

INDIA BEAT FRAZIL in a six-keeper showdown but the 5-1 victory was marred by the loss of 10 wickets in the second innings.

We'll beat him, but at times you have to show the little bit of self-discipline in Trinidad, if you repeat that. We'll be on the look-out for him in the next Test against Sri Lanka.

Bateen reached his thirty on the night of Australia's opening Test at Edgbaston and it was on that occasion that he made his debut for Zimbabwe in 1967. He went on to make his debut for Zimbabwe in 1967. Dwayne Bravo was also playing in his 100th Test. Ponting, who has been playing for the last 10 years, made an unwanted milestone in his 100th Test.

The three former Zimbabwean batsmen, who are the only two players to have scored 1000 first-class runs in a calendar year, were also playing in their 100th Test.

This was Ponting’s 100th Test and he played in his 100th Test match against India.

He is a very good player and a very good batsman. He has played in some fantastic Test matches and he will be missed for sure. He is a very good player.

His 100th Test came against Sri Lanka in the previous Test in Galle, where he scored 175 runs.

The first Test between India and South Africa at the VPCA Stadium in Mohali was abandoned on Sunday due to heavy rain. The focus now shifts to Mohali where the teams will be scheduled on September 19.

Catch 22 for Advani in world e-chess billiards

Smashing past financial aches, lack of support partner and tough adversary, Verma nailts Vietnam Super 100

PRAGYA, October 13 (IANS) - Poonam Advani, having gained a lot of momentum in her world e-chess billiards career, is all set to play in a championship in Vietnam Super 100 at Son tra in Danang in Vietnam.

The 22-year-old Indian woman-rated player had earlier won the championship in the World E-Billiards Championship which was held in Slovenia in May this year. The championship was part of the World E-Billiards Championships which came to a close on Sunday, said Advani.

Advani, who had won the championship in Slovenia, is all set to play in Vietnam Super 100 for the second time. She won the championship in 2017 and is looking forward to another victory.

Advani said she would try her best to win the championship.

“Last time I played in this championship, I won it comfortably, but it was just a round-robin format. This time the winner will be decided after a long series of matches. This will be more of a test of my overall strength,” said Advani.

Advani, who has been playing e-chess since 2013, is one of the top-rated players in the world and has won several championships.

She said she was looking forward to playing in Vietnam Super 100.

Advani said she would try her best to win the championship and hopes to win it again.

“Vietnam Super 100 is one of the biggest championships in the world and I am looking forward to playing in it. I hope I can win it again,” she said.

Advani, who is currently ranked 11th in the world, said she would try her best to win the championship.

“Vietnam Super 100 is one of the biggest championships in the world and I am looking forward to playing in it. I hope I can win it again,” she said.

Advani, who is currently ranked 11th in the world, said she would try her best to win the championship. She said she had been working hard for the past few months to prepare for the championship.

“Vietnam Super 100 is one of the biggest championships in the world and I am looking forward to playing in it. I hope I can win it again,” she said.

Barcelona's 30-year-old forward Ansu Fati continues his productive start to the season, scoring and providing an assist as the La Liga champions thrashed Valencia 5-2 at Camp Nou on Sunday.

**TINECRO**

A TINERCAso Barcelona came to a screeching halt after a false start when former team captain Andres Iniesta equalized, but the Catalans ultimately found their groove in the second half and surging into the lead to complete the comeback.

Barcelona's Spanish-speaking teammate from Argentina, Lionel Messi, scored twice in the first half to set the tone for the match. The forward's 10th goal of the season moved him past teammate Ousmane Dembele for the club lead.

**Outplayed Atletico**

Despite the setback, Barcelona continued to dominate the game and eventually won the match with a 5-2 victory over Valencia.

**Outplayed Atletico**

Barcelona, which was without Luis Suarez due to a red card in its previous game, looked to consolidate its lead in the La Liga standings with a win over Atletico Madrid.

The match began with Atletico taking the lead in the 23rd minute when Karim Benzema scored from a tight angle. However, Atletico was unable to maintain its lead as Barcelona responded with a goal in the 37th minute through Lionel Messi.

**Revenge**

Barcelona's dominant performance was not without its moments of tension, as Atletico managed to hold the score at 2-2 until the final minutes of the match.

**Game of the Century**

The match between Barcelona and Atletico was a highly anticipated game, with both teams looking to solidify their positions in the La Liga standings.

**Neymar scores winner in Champions League**

Neymar, who had been out since March with a broken bone in his right foot, returned to action for Barcelona in the match against Atletico Madrid.

Neymar scored the winning goal in the 90th minute to secure a 2-1 victory for Barcelona and move the team closer to the top of the La Liga table.

**Neymar's return**

Barcelona announced on Thursday that Neymar would be available for selection for the match against Atletico Madrid.

Neymar's return was highly anticipated, as the Brazilian forward had been out for over three months due to a broken bone in his right foot.

**Neymar's return**

Neymar scored the winning goal in the 90th minute to secure a 2-1 victory for Barcelona and move the team closer to the top of the La Liga table.

Neymar's return was highly anticipated, as the Brazilian forward had been out for over three months due to a broken bone in his right foot.
